A classic slope; once the road begins to narrow, the 34-25 is recommended. - Davide Cassani

The 1988 Giro d'Italia, under heavy snowfall, consecrated this as an EPIC CLIMB! This ancient roadway that connected the "Magnificent Land" with the "Venices" has become a must in the cycling world. The road _ quite narrow _ is much more adept to bikes than cars. In the final stretch, the steep turns put legs and lungs to the test.
